Commercial vehicle transmission fluids designed for different transportation needs.

- Specially formulated for various transmission systems.
- Reliable protection for longer transmission service life.
- Overall Improvement in transmission efficiency.
- Effective reduction in transmission maintenance costs.

AFTERMARKET

Together we are maximizing Mobility Uptime.

ZF Aftermarket is a division of ZF Friedrichshafen AG, a global technology company that specializes in driveline and chassis technology as well as active and passive safety technology.

ZF Aftermarket Africa has its head offices in Johannesburg, South Africa. With Fully Equipped Workshops in Johannesburg and Cape Town and a branch in Kwazulu-Natal, we service the African Aftermarket across all Business Lines.

ZF Aftermarket Africa focuses on providing aftermarket products and services for various vehicles, including passenger cars, commercial vehicles, and industrial applications (mining, agricultural, military, and marine). Our primary goal is to support customers with high quality spare parts, technical expertise, and innovative solutions to ensure the reliable operation and maintenance of vehicles.

Some of the key activities and services provided by ZF Aftermarket Africa include spare parts; distribution – original equipment; technical support and field services; repair, overhaul, retrofit, and exchange unit services; fleet support services; training; diagnostics; telematics; and online platforms.

Products and technical services are available throughout the region through our structured distribution network and specialized Driveline and Braking Service Partners.

Overall, ZF Aftermarket Africa plays a crucial role in supporting the automotive and industrial sectors in

Africa by providing reliable aftermarket solutions and services for all ZF Aftermarket products which are presented in the market under ZF, Lemförder, SACHS, TRW and WABCO brands.

Our Johannesburg & Cape Town facilities boast a comprehensive onsite workshop, where our highly trained staff utilise state-of-the-art equipment to perform services and repairs. Our team is always available to serve as customer contacts and problem solvers, allowing us to address customer needs promptly and flexibly.

Our offerings include product sales for various divisions, consulting and training, diagnostics, swift supply of original spare parts, retrofitting, upgrading, and maintenance and repair of ZF-manufactured transmissions and axles for all vehicle types.

We provide cost-effective repairs with a one-year warranty at our workshops. Hounds Maintenance contracts ensure equipment remains in top condition and helps identify faults before they become major issues. To minimize downtime, we maintain a backup stock of units. Once a repair quotation is provided, an identical reconditioned unit can be supplied from this stock for immediate installation, allowing customers to resume work without delay. Our services are ISO:9001:2008 certified.

We have specialized and tailor-made training programmes across the region, with our team of specialists providing expert support ensuring that issues are quickly and efficiently resolved, minimizing downtime. Our training programmes support skills development, address staff retention challenges and anticipate technological changes.
